

Hello again

Welcome to the 3rd edition of OrbisEnergy News, a quick update before the building quiets down over the summer holidays – should summertime agree to arrive anytime soon!

It's been a busy couple of months, we've let loose hordes of school children throughout the building to meet you, we've hosted work experience students and held events from the ORE Launch Academy to Offshore Wind meets Space East to Fish & Chip Fryday. For me, it's been great to get to know the many individuals that make up the OrbisEnergy business community that little bit better and I'm grateful for your support and engagement – happy reading, Ian

Team spotlight

In July we were pleased to host Year 10 work experience students, Millie and Theo from Benjamin Britten School.

During their time here, they got involved in all aspects of running OrbisEnergy.

A massive thank you to all the businesses who opened their doors and met with Millie and Theo over the two weeks, it formed an important part of their experience whilst providing them with a wider understanding of the energy sector we're all a part of.

Welcome!

Introducing 2 new VIPs to OrbisEnergy in July

Cyan Renewables is Asia's first pure-play offshore wind vessel owner investing in a fleet of Cable-Lay Vessels, Service Operation Vessels and Wind Turbine Installation Vessels. Contact: stuart.thornton@cyanrenewables.com

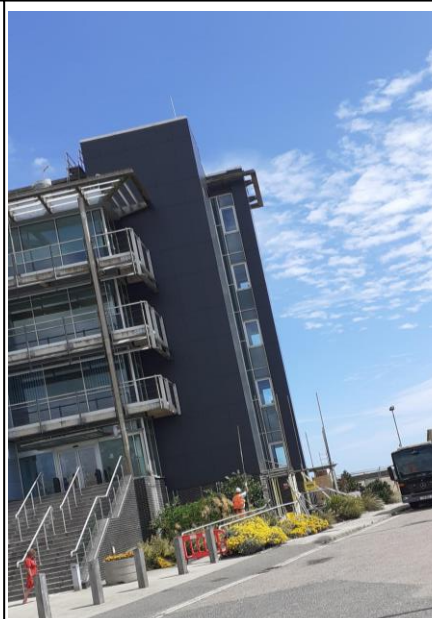

Randall Accommodation provides spacious, stylish and welcoming serviced accommodation in Great Yarmouth, perfect for visiting professionals and energy leaders. Contact: info@randallaccommodation.co.uk

Cladding update

As you will have no doubt noticed, the cladding works is coming to an end on schedule with the scaffolding slowly being removed to reveal a fresh new look for the building.

We appreciate that at times it's been incredibly challenging in terms of noise and on-site restrictions, and we thank you for your continued patience and cooperation during this essential maintenance project.

Meet the OWL

We've recently tamed a new piece of tech for use in the boardroom and meeting rooms. The OWL is a clever piece of plug and play kit which connects to your own device during teams or zoom meetings, capturing the people in the room and vastly enhancing the hybrid meeting experience. Just book it from reception when you need it.

Review:

Fish & Chip Fryday

14 July was officially 'Fish & Chip Fryday' at OrbisEnergy with well over 30 people enjoying hearty portions of fish, chips and mushy peas. Kindly sponsored by ScottishPower Renewables, the lunch was attended by both office and virtual tenants and a great opportunity to network in an informal setting. We'd like to keep the momentum going with activities like this, so please let the OrbisEnergy team know if you want to sponsor something similar.

Review:

Offshore Renewables meets Space

The space sector contributes £17.5 billion to the UK economy and is a real source of opportunity for innovative local businesses across many supply chains.

On 06 July we hosted an offshore renewables meets space sector briefing with ORE Catapult, Space East, UK Space Agency, European Space Agency, Satellite Applications Catapult and New Anglia LEP.

Upcoming events

Review:

Redstart Yr6 Money Counts

In June and July, year 6 children from Gunton and Beccles Primaries came to OrbisEnergy to do the [Redstart Educate Money Counts workshop](#), they also enjoyed VR headsets and a building tour.

VIP profile – Fristads

After introducing GREEN garments with Environmental Product Declarations, Fristads have launched a recycling service, bringing circular production a step closer. Recycle bins are located at Fristads' Great Yarmouth office where workwear users can drop off old garments which are recycled into new products, ensuring nothing goes to landfill. rob.freeman@fristads.com
